

Report of the group Women in the Economy

Jennie Ferm, Dagmar Lipper, Cordula Niklaus, Angelika Hofmann, Dr. Vanessa Rosser

Main points from the workshop

- We demand a changed gender inclusive legislation
- We need a generation inclusive economy
- We have to put pressure on companies to provide an equal work space
- We demand a strong connection between civil society and governments

Further points

- Women have to support women
- Statistics with women numbers
- We have to have roll-models
- Women have to unite in their efforts and work and fight together in the economy and politics
- Women need to go into government
- Gender sensitive economy
- Improve situation at the work space, more inclusion, gender sensitive companies
 - o Certification for equality policy
- Education is the start for a good position for women in the economy
- We also need man who fight for equal rights of women in the economy
- We need a well-being economy in contrary to GDP-driven economy
- We need a sustainable, inclusive, equal economy
- Data are important in every economical sector
- International standards for care work are necessary to be able to compare
- We need gender sensitive education already in kindergarden and preschool
- Young women need a complete social infrastructure in the rural areas too
- We need a spirit for entrepreneurship between women
- Care and public services as a right
- Paid childcare for women so long as the child is considered a dependant
- Entrepreneurial empowerment while women provide childcare
- Training young girls in STEM, AI, Leadership
- Parental training for effective communication and equitable treatment of next generation women
- Recruitment of adolescent girls into activist groups locally
-
